

MATRIX Photo Specs for NYS/UNYREIS

From GRAR Member Services

NYS MATRIX Photo Specs

Photos

- Matrix can hold a maximum of 36 photos per listing
- For maximum quality, photos should be at least 1024x768 pixels in size
- ***If a photo is uploaded in a different resolution ratio (than 4:3), Matrix will auto-fit by adding padding (white space) to either the top and bottom or the left and right sides of the photo.***

You can also edit the images to 1024x768 by changing the Px dimensions to 1024x768 with a DPI of around 90.... editing software may automatically reduce the DPI if it is very large.

Editing Photos

When editing a listing (in Add/Edit after selecting a listing to Edit), go to the "Manage Photos" screen. Here you may upload multiple photos at once by holding the Ctrl (Option) key down when clicking on the filenames. To **change the order of** your photos once uploaded, drag by the grey title bar. There's an option in the bottom left hand corner to add a **Description** when adding/editing a photo. Click on any image to view its **Details**

Photograph Upload Certification

Each time a user uploads one or more photographs to Matrix, they will be agreeing to the **PHOTOGRAPH UPLOAD CERTIFICATION** disclaimer text* now displayed in a scrollable textbox just below the image(s) being uploaded and above the **Certify and Save** button. Different sections of the agreement apply to different users whether they are a real estate professional, assistant, staff and/or professional photographer.

Matrix will log when an individual uploads photograph(s).
